

Best practices:

- Promotion towards building a vibrant and eco-friendly clean Campus. Objectives of the Practice are: Foster and nurture eco-friendly culture. Build campus that is plastic free, minimal waste generation, protects biodiversity, sustainability. Usage of natural resources such as water and energy and reduction of overall Carbon footprints. This is a collective effort of all stakeholders that can be accomplished with implementation of eco-friendly practices. College maintains greenery and eco-friendly environment at its best in its limited open space. It adopts steps towards reducing carbon footprints and preserving biodiversity by implementing mechanisms for waste management, water conservation, compost production and generation of solar energy.
- Social Commitment and Community Outreach. Objectives of the Practice: Develop spirit of social service and commitment. Spreading awareness amongst students toward existing social problems, empathy towards underprivileged sections of society, women empowerment, education, safety, health and nutrition. Work for betterment of marginalized section of society.
